

Clinching is much more than what you think

If you think that clinching is only about joining 2x1 mm, 2x20ga in mild steel, read on...

Multi-layer

Large differences in thickness

Different materials

Intermediate insulation

Sandwich plates

Rubber gasket

Galvanized

Pre-coated

Vinyl coating

Serigraphic coating

Grids and meshes

Plastics

Combination with adhesives

Integrated closing of gaps

Under water joining

And much more

We are sure that the above qualities and features would be interesting for a multitude of your potential applications.

We are there to assist you.
